

OSNI Launch Northern Ireland Mapping Agreement

Under the new Northern Ireland Mapping Agreement (NIMA), Ordnance Survey of Northern Ireland will supply Geographic Information to all Northern Ireland Civil Service Departments, Agencies and NDPBs, at zero net cost, for a period of 3 years. Also, under the agreement, local Councils will be able to purchase OSNI data at a significantly reduced cost.

NIMA has been developed to improve the quality and efficiency of services delivered by the Northern Ireland public sector through the increased use of Geographical Information Systems. 18 products are available through NIMA including: large-scale vector data, various raster map scale products, the 800,000 address records of Pointer® and Orthophotography.

CDR will be exhibiting at the OSNI event at Stormont on 26th June 2006, presenting the details of the agreement to eligible organisations. Contact OSNI or CDR for further details.
