

## Introducing MapInfo Professional® v12.0

We are delighted to announce the launch of MapInfo Professional 12.0. The official launch of MapInfo Professional in the UK took place at the MapInfo User Group Summer Conference in London on 20th June 2013. For clients on the Annual Maintenance Program, you will receive your notifications by email shortly after this date for a digital download of the new software. MapInfo Professional v12.0 brings major improvements to creating high quality cartographic output with improvements to the labelling, Legend Designer, Layout Window, scale bars and more.

Other improvements include support for Windows 8, SQLite and PostGis v2.0, improved import/export capabilities, tools for converting linework to regions, many ease of use enhancements and lots more!

To coincide with the launch of MapInfo Professional v12.0, Pitney Bowes Software has re-launched the [www.mapinfo.com](http://www.mapinfo.com) website as the focus for all things MapInfo. Please get in touch first to make sure there is a place for you.
