

CDR Group delighted to be amongst the first

Ordnance Survey® of Northern Ireland have announced the first set of GIS experts to be appointed as Licensed Partners and CDR Group is delighted to be amongst them.

OSNI® Licensed Partners are companies who have completed the OSNI® Licensed Partner Programme, gaining a good understanding of OSNI® data, strategies and processes, and work in a close partnership with OSNI®. Each Licensed Partner has completed a rigorous programme to obtain their licence, including verification of the GI expertise in their company, attendance at a seminar and signing of an agreement.

You can be confident that, if you choose an OSNI® Licensed Partner to supply your GIS, they have a detailed knowledge of OSNI® data and products. CDR also has access to the most up-to-date OSNI® data products so that we can provide the best solutions tailored to your business requirements.

This latest endorsement follows from the many years of CDR experience in Northern Ireland, having first supplied DoE with STC25 software back in 1991 and Belfast City Council with MapInfo in 1999.
