

Introducing Vertical Mapper V3.5

Pitney Bowes MapInfo have just launched a new version of the popular Vertical Mapper™ application for MapInfo Professional®. The program has been updated and improved with over 150 features being addressed. Enjoy new access from the more-familiar MapBasic® programming language to automate repeatable tasks and processes. Some 69 sample applications provide a fast, easy start to leverage Vertical Mapper functionality in your everyday work.

With support for the latest native file format (.tab) enhancements, users will appreciate the expanded capabilities of the new Vertical Mapper file access library, including:

Access to very large geographic objects. The number of nodes for polygon or polyline objects has raised from 1.1 million nodes to more than 134 million nodes.

Time and Date field type support.

Access to all MapInfo Professional® v9.5.1 supported datums and projections.

ADDITIONAL NEW FEATURES:

Convenient software development kit (SDK) to add custom functionality or automate repeatable tasks.

Exclusive, never-before-released builds with numerous new functions and enhancements from a combination of public and private sources.

Windows® Vista operating system support.

Simplified installation and deployment options including silent install.

Existing customers can now upgrade and even take out an Annual Maintenance contract, as further development work on this product is already underway. Contact our Sales team for a quotation.
